semiotics as a tool for learning mathematics is a collection of ten theoretical and empirical chapters from researchers all over the world who are interested in semiotic notions and their practical uses in mathematics classrooms collectively they present a semiotic contribution to enhance pedagogical aspects both for the teaching of school mathematics and for the preparation of pre service teachers this enhancement involves the use of diagrams to visualize implicit or explicit mathematical relations and the use of mathematical discourse to facilitate the emergence of inferential reasoning in the process of argumentation it will also

facilitate the construction of proofs and solutions of mathematical problems as well as the progressive construction of mathematical conceptions that eventually will approximate the concepts encoded in mathematical symbols these symbols hinge not only of mental operations but also on indexical and iconic aspects aspects which often are not taken into account when working on the meaning of mathematical symbols for such an enhancement to happen it is necessary to transform basic notions of semiotic theories to make them usable for mathematics education in addition it is also necessary to back theoretical claims with empirical data this anthology attempts to deal with such a conjunction overall this book can be used as a theoretical basis for further semiotic considerations as well as for the design of different ways of teaching mathematical concepts

this volume was first published by inter disciplinary press in 2016 if indeed vision is the art of seeing what is invisible to others as jonathan swift has so famously phrased it then visual literacy is the art of translating the seen through image word and gesture so that the invisible can be made visible to others in other words visual literacy specifies a process of articulation that employs both sight and insight in the service of interpreting the language of the image reading the narrative of the graphic and deciphering the codes and modes of the visual this volume represents an attempt to convey some of the many ideas surrounding visual literacy and advance the interdisciplinary field of visual literacy studies toward new areas of research and inquiry

beyond sustainable discusses the relationship between human beings and the constructed environments of habitation we create living in the anthropocene an increasingly volatile and unpredictable landscape of certain change this volume accepts that human beings have reached a moment beyond climatological and ecological crisis it asks not how we resolve the crisis but rather how we can cope with or adapt to the irreversible changes in the earth system by rethinking how we choose to inhabit the world ecology through an examination of numerous historical and contemporary projects of architecture and art as well as observations in philosophy ecology evolutionary biology genetics neurobiology and psychology this book reimagines architecture capable of influencing and impacting who we are how we live what we feel and even how we evolve beyond sustainable provides students and academics with a single comprehensive overview of this architectural reconceptualization which is grounded in

an ecologically inclusive and co productive understanding of architecture

this book provides an overview of a range of quantitative methods presenting a thorough analytical toolbox which will be of practical use to researchers across the social sciences as they face the challenges raised by new technology driven language practices the book is driven by a reflexive mind set which views quantifying methods as complementary rather than in opposition to qualitative methods and the chapters analyse a multitude of different intra and extra textual context levels essential for the understanding of how meaning is re constructed in society uniting contributions from a range of national and disciplinary traditions the chapters in this volume bring together state of the art research from british canadian french german and swiss authors representing the fields of political science sociology linguistics computer science and statistics it will be of particular interest to discourse analysts but also to other scholars working in the digital humanities and with big data of any kind

there are hundreds of structurally deficient or functionally obsolete bridges in the state of iowa with the majority of these bridges located on rural county roads where there is limited funding available to replace the bridges diagnostic load testing can be utilized to determine the actual load carrying capacity of the bridge one particular family or fleet of bridges that has been determined to be desirable for load testing consists of single span bridges with non composite

cast in place concrete decks steel stringers and timber substructures six bridges with poor performing superstructure and substructure from the aforementioned family of bridges were selected to be load tested the six bridges were located on rural roads in five different counties in iowa boone carroll humboldt mahaska and marshall volume i of this report presents diagnostic load tests on the superstructure of the six bridges the results of the diagnostic load tests were used to calibrate analytical models of the bridges for rating purposes all of the bridges were independently rated by three rating agencies using a codified approach those ratings were then compared to ratings calculated using a bridge model calibrated to the actual response of the bridge due to the load test the calibrated bridge model was then used to rate the bridges and determine whether an increase in the initial codified bridge ratings was feasible volume i of this report focuses on evaluating the superstructure for this family of bridges this volume discusses the behavior characteristics that influence the load carrying capacity of this fleet of bridges in particular the live load distribution partial composite action and bearing restraint were investigated as potential factors that could influence the bridge ratings implementing fleet management practices the bridges were analyzed to determine if the load test results could be predicted to better analyze previously untested bridges for this family of bridges it was found that the ratings increased as a result of the load testing demonstrating a greater capacity than determined analytically volume ii of this report focuses on evaluating the timber substructure for this family of bridges in this volume procedures for detecting pile internal decay using nondestructive ultrasonic stress wave techniques correlating nondestructive ultrasonic stress wave techniques to axial compression tests to estimate deteriorated pile residual strength and evaluating load distribution through poor performing timber substructure elements by instrumenting and load testing the abutments of the six selected bridges are discussed also in this volume pile repair methods for restoring axial and bending capacities of pile are developed and evaluated
